## EXPERIENCE THE DIEDRICH DIFFERENCE

### Helping Roast Masters Craft The Best Tasting Coffee Worldwide.

- We use solid carbon steel drums to distribute heat evenly.
- Diedrich uses finely-tuned infrared burners.
- Clean and efficient. Designed to prevent exhaust back flow.
- Log and store roasting data profiles via third party software.
- Ability to view roast profile data and control the roaster from any wireless device that supports third party software.
- Comprehensive training offered at our state of the art facility in Chicago.

### Handcrafted In The USA

Every Diedrich Roaster is custom built and rigorously tested to meet the highest quality standards in every machine.

### Exceptional Customer Support

You can depend on Diedrich to be there for you from green to ground to maximize your investment.

### Expanded Process Systems Solution

Roast with confidence. Our process design capabilities and expertise support you in a seamless start-to-finish coffee processing system
